No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts, 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1981 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 25

Number 1, June 1981

Health Surveillance around Point Sources of Pollution: Proceedings of a Workshop, Albuquerque, New Mexico, January 22–24, 1979

James H. Stebbings, Jr. Epidemiology, Public Health, and Health Surveillance around Point Sources of Pollution. 1

Genevieve M. Matanoski, Emanuel Landau, James Tonascia, Christina Lazar, Elizabeth A. Elliott, William McEnroe, and Katherine King. Cancer Mortality in an Industrial Area of Baltimore. 8

Joseph L. Lyon, Melville R. Klauber, William Graff, and Grace Chiu. Cancer Clustering Around Point Sources of Pollution: Assessment by a Case-Control Methodology. 29

Saxon Graham. Methodological Problems in Ecologic Studies of the Asbestos–Cancer Relationship. 35

Eunice E. Sigurdson, Barry S. Levy, Jack Mandel, Richard McHugh, Leonard J. Michienzi, Helen Jagger, and John Pearson. Cancer Morbidity Investigations: Lessons from the Duluth Study of Possible Effects of Asbestos in Drinking Water. 50

Sandra S. Stinnett, Patricia A. Buffler, and Clayton W. Eifler. A Case–Control Method for Assessing Environmental Risks from Multiple Industrial Point Sources. 62

George K. Tokuhata and Martha W. Smith. History of Health Studies around Nuclear Facilities: a Methodological Consideration. . 75

James H. Stebbings, Jr. and George L. Voelz. Morbidity and Mortality in Los Alamos County, New Mexico. I. Methodological Issues and Preliminary Results. 86

D. K. Dixon-Davis, J. J. Collins, and D. Grahn. Mortality in 191 Counties near Energy Facilities: Use of Economic and Social Variables for Standardization. 106

Frank A. Gifford. Estimating Ground-Level Concentration Patterns from Isolated Air-Pollution Sources: A Brief Summary. 126

Clayton W. Eifler, Sandra S. Stinnett, and Patricia A. Buffler. Simple Models for Community Exposure from Point Sources of Pollution. 139

Michael E. Ginevan. A Poisson Trials Approach to Interpopulation Comparisons of Cause of Death Data. 147

GERALD J. NEHLS, CARL G. HAYES, AND WILLIAM C. NELSON. Confidentiality and Freedom of Information for Epidemiological Data in Governmental Research. 160

SUSAN T. SACKS AND STEVE SELVIN. A Method for Detecting a Cohort Exposure. 167

ERNEST B. HOOK. Human Teratogenic and Mutagenic Markers in Monitoring about Point Sources of Pollution. 178

PHILIP J. LANDRIGAN AND EDWARD L. BAKER. Exposure of Children to Heavy Metals from Smelters: Epidemiology and Toxic Consequences. 204

MICHAEL D. LEBOWITZ. Respiratory Indicators. 225

INGE F. GOLDSTEIN. The Use of Biological Markers in Studies of Health Effects of Pollutants. Foreword to the Proceedings of the Second Workshop on Health Surveillance around Point Sources of Pollution . . . 236

NUMBER 2, AUGUST 1981

A. W. P. JARVIE, R. N. MARKALL, AND H. R. POTTER. Decomposition of Organolead Compounds in Aqueous Systems. 241

L. C. RAI, J. P. GAUR, AND H. D. KUMAR. Protective Effects of Certain Environmental Factors on the Toxicity of Zinc, Mercury, and Methylmercury to *Chlorella vulgaris*. 250

TOMA NICULESCU, RODICA DUMITRU, AND DUMITRU BURNEA. Changes of Copper, Iron, and Zinc in the Serum of Patients with Silicosis, Silicotuberculosis, and Active Lung Tuberculosis. 260

BROOKE T. MOSSMAN AND JOHN E. CRAIGHEAD. Mechanisms of Asbestos Carcinogenesis. 269

K. KOSTIAL, I. ŠIMONOVIĆ, I. RABAR, AND M. LANDEKA. Effect of Rat's Diet on ^{85}Sr, ^{115m}Cd, and ^{203}Hg Absorption in Sucklings Rats . . 281

MARIE VAHTER. Biotransformation of Trivalent and Pentavalent Inorganic Arsenic in Mice and Rats. 286

HAJIME ODA, HIROKAZU TSUBONE, AKIRA SUZUKI, TAKAMICHI ICHINOSE, AND KENTARO KUBOTA. Alterations of Nitrite and Nitrate Concentrations in the Blood of Mice Exposed to Nitrogen Dioxide. 294

M. H. WONG, C. K. CHOY, W. M. LAU, AND Y. H. CHEUNG. Heavy-Metal Contamination of the Pacific Oysters (*Crassostrea gigas*) Cultured in Deep Bay, Hong Kong. 302

HISAO TORIUMI AND MAKOTO KAWAI. Free Erythrocyte Protoporphyrin (FEP) in a General Population, Workers Exposed to Low-Level Lead, and Organic-Solvent Workers. 310

MARC B. SCHENKER, FRANK E. SPEIZER, AND JAMES O. TAYLOR. Acute Upper Respiratory Symptoms Resulting from Exposure to Zinc Chloride Aerosol. 317

DANIEL L. ELY, RICHARD A. MOSTARDI, NANCY WOEBKENBERG, AND DAWN WORSTELL. Aerometric and Hair Trace Metal Content in Learning-Disabled Children. 325

JANE Q. KOENIG, WILLIAM E. PIERSON, MARTHA HORIKE, AND ROBERT FRANK. Effects of SO_2 plus NaCl Aerosol Combined with Moderate Exercise on Pulmonary Function in Asthmatic Adolescents. 340

WILLIAM H. HALLENBECK, DONALD R. MARKEY, AND DAVID G. DOLAN. Analyses of Tissue, Blood, and Urine Samples from a Baboon Gavaged with Chrysotile and Crocidolite Asbestos. 349

GERHARD RÖDERER. On the Toxic Effects of Tetraethyl Lead and Its Derivatives on the Chrysophyte *Poterioochromonas malhamensis*. II. Triethyl Lead, Diethyl Lead, and Inorganic Lead. 361

R. H. STEVENS, D. A. COLE, AND E. S. MEEK. Antibody-Dependent Cell Cytotoxicity in Chemical-Induced Rat Pancreas and Colon Cancer. . 372

F. ANDRÉ, J. GILLON, C. ANDRÉ, AND G. JOURDAN. Prevention of Reaginic Antibody Production and Anaphylactic Gastric Ulcer by Pesticides and by a Polychlorinated Biphenyl. 381

TEE-PING LEE. The Inhibition of PMN β-Glucuronidase Release by Aroclor 1254. 386

ANNE JOHANSSON, PER CAMNER, AND BENGT ROBERTSON. Effects of Long-Term Nickel Dust Exposure on Rabbit Alveolar Epithelium. . . 391

W. S. LINN, M. T. KLEINMAN, R. M. BAILEY, D. A. MEDWAY, C. E. SPIER, J. D. WHYNOT, K. R. ANDERSON, AND J. D. HACKNEY. Human Respiratory Responses to an Aerosol Containing Zinc Ammonium Sulfate. 404

ALESSANDRO CAVALLERI, ADRIANA BARUFFINI, CLAUDIO MINOIA, AND LAURA BIANCO. Biological Response of Children to Low Levels of Inorganic Lead. 415

JOSEF HURYCH, ELIŠKA MIŘEJOVSKÁ, VALDEMAR KOBRLE, AND JIŘINA RENCOVÁ. Enzyme Changes during Experimental Silicotic Fibrosis. I. PZ Peptidase and Collagen Deposition in the Lungs. 424

ELIŠKA MIŘEJOVSKÁ, ARNOŠT BASS, JOSEF HURYCH, AND JAN TEISINGER. Enzyme Changes during Experimental Silicotic Fibrosis. II. Intermediary Metabolism Enzymes of the Lungs. 434

HERT BRUNEKREEF, SIEBRAND J. VEENSTRA, KLAAS BIERSTEKER, AND JAN S. M. BOLEIJ. The Arnhem Lead Study. I. Lead Uptake by 1- to

3-Year-Old Children Living in the Vicinity of a Secondary Lead Smelter in Arnhem, The Netherlands. 441

Jodokus A. L. Diemel, Bert Brunekreef, Jan S. M. Boleij, Klaas Biersteker, and Siebrand J. Veenstra. The Arnhem Lead Study. II. Indoor Pollution, and Indoor/Outdoor Relationships. 449

Book Reviews. 457

Author Index for Volume 25. 460

The Subject Index for Volume 25 will appear in the December 1981 issue as part of a cumulative index for the year 1981.

INSTRUCTIONS TO AUTHORS

Manuscripts. Papers may represent original research in any of the disciplines now concerned with man-environmental relationships; it is anticipated that the relevance of the findings to broad problems of environmental biology and environmental medicine will be considered. Analytical and integrative reviews are equally eligible. The editorial emphasis of the Journal is on research concerning health effects of environmental alterations, broadly considered; engineering and control efforts are well served elsewhere.

Selected Book Reviews will be included.

Submission of Manuscripts. These should be submitted in duplicate to any member of the Board of Editors or to ENVIRONMENTAL RESEARCH, Editorial Offices, Environmental Sciences Laboratory, Mount Sinai School of Medicine, Fifth Avenue and 100th Street, New York, New York 10029. Further, prior review of the paper may be undertaken with a member of the Board of Consulting Editors, especially one with particular competence in the area concerned (as, environmental physiology, epidemiology and biostatistics, ecology, occupational medicine, toxicology, anthropology, climatology, air pollution, environmental medicine, geophysics, etc.); this will often expedite consideration of the paper.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Environmental Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All papers will be published in English. It is preferable that papers be submitted in English to insure faithfulness to the author's meaning. If necessary, however, a translation will be arranged.

Form of Manuscript. Manuscripts should be typewritten (not mimeographed) with double or triple spacing and wide margins on high quality bond paper. Subdivision of the article into *Abstract* (50–200 words), *Introduction, Materials and Methods, Results, Discussion, Acknowledgments* and *References* is recommended. However, variations of this format are acceptable if they provide clearer expression of the subject. In addition, section headings are often useful.

The first page of the manuscript should contain the article title, author's name, and affiliation (include zip code where applicable). The second page should contain a proposed running head of fewer than 40 characters and the address of the person to whom proofs are to be sent. In the upper left-hand corner of each following page (including Reference pages, Tables, etc.) please type a shortened form of the title and the surname of the senior author. Please also number each of these pages.

Abbreviations. Follow the usage established by *Chemical Abstracts.* If others are utilized define on first use.

Figures and Tables. Number all figures consecutively with arabic numerals; legends should be typed together on a separate sheet. Lettering on the original figures should be large enough to take a reduction of 50–60 per cent. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8½″ × 11″; grid lines that are to show in the engraving should be inked in black. Photographs should be glossy prints (5″ × 7″ or 8″ × 10″) with strong contrasts. X-rays should be right-reading glossy prints.

Tables are to be typed on separate pages and numbered with arabic numerals; a table title should be included.

Footnotes. Footnotes in the text are identified by superscript *numerals* and listed on a separate sheet; in the *tables* by superscript *letters* and placed at the bottom of the table.

References. These are to be cited in the text by the author's name and year of publication. References should be listed alphabetically at the end of the paper in the following order:

Curry, A. S. (1963). Acidic and neutral poisons. *In* "Progress in Chemical Toxicology" (A. Stolman, Ed.), Vol. 1, pp. 135–155, Academic Press, New York.

Waller, R. E., Commins, B. T., and Lawther, P. J. (1965). Air pollution in a city street. *Brit. J. Industr.* **22**, 128–138.

The names of journals should be abbreviated according to the *Index Medicus* or Chemical Abstracts' *Service Source Index*. Include in the reference list articles that are "in press," but incorporate in the text or use footnotes for "manuscript in preparation," "personal communication," or "unpublished observations."

Reprints. A reprint order form will accompany galley proofs. The senior author receives 50 reprints free of charge, and additional copies may be ordered.

Correspondence. Editorial communications should be addressed to ENVIRONMENTAL RESEARCH, Editorial Offices, Environmental Sciences Laboratory, Mount Sinai School of Medicine, Fifth Avenue and 100th Street, New York, N.Y. 10029. Business correspondence and information concerning subscriptions should be addressed to Academic Press, Inc., Journal Production Department, 111 Fifth Avenue, New York, N.Y. 10003.
